WEBUYE WEST HOSPITAL
COMMUNITY OUTREACH DEPARTMENT REPORT
Date: 6th January 2026
Prepared by: Nelvin Juma

I reported to my workstation at 9:00 a.m. Upon reporting, I was taken through an orientation session by Ms. Alice, the Hospital Administrator. The orientation focused on understanding the hospital's structure, operations, and departmental roles.
During the familiarization process, I was introduced to the various hospital departments and their respective staff members as follows:

~Pharmacy: Mercy Wangayile
~Laboratory: Abhi Juma
~Clinical Department: Rebecca
~Reception: Robai Situma
~ANC/MCH: Eliud Wanyira
~Nursing Station: Ruth Nawati
~Support Staff: Samuel Juma
~New Staff (Social Work): Selina – with whom I was being oriented .

After the orientation, I held a brief meeting with the Hospital Administrator to discuss my plan and how we can kick-start the marketing strategy. I proposed that

during the current week,considering schools are still opening and settling in ,I remain within the facility to map out hospital services, identify priority services for marketing, and engage the Bokoli community to familiarize them with the facility's operations.

This approach was agreed upon as a foundation to kick-start an effective marketing strategy.
We concluded that I develop a plan to familiarize the Bokoli community—including villages, churches, markets, chief barazas, schools, and bodabodas with Webuye West Hospital services.

The plan will also include a budget, which I am still working on and will submit before the end of the day tomorrow. Additionally, we agreed to introduce a patient follow-up and feedback system to enhance service delivery and improve patient satisfaction.
I concluded my day at 6:00 p.m.
